Scientific Calculator

Final Project Using Python

-

- **Project Name:**

    " Scientific Calculator"

- **Group Leader:**

    °Maryam Tahir°

    - **Group Member:**
    1. Maryam Tahir
    2. Syeda Rahab Fatima
    3. Warisha

    - **Project Details:**

- → <u>Objective</u>: Creating a Python-based scientific calculator for various mathematical operations.
- → <u>Features</u>: Includes basic arithmetic, advanced functions, user-friendly interface, and error handling.
- → <u>Implementation:</u> Utilizes Python's math for functionality and GUI.
- → <u>Team:</u> Developed collaboratively by Maryam , Rahab and Warisha.
- → <u>Timeline:</u> Developed over one week.

- ● *<u>Real Life Example:</u>*

~<u>Educational Tool:</u> Helps students with complex calculations in math and science courses.

~<u>Research Aid:</u> Assists researchers indata analysis and modeling.

~<u>Professional Use:</u> Supports professionals in finance, engineering, and scientific fields for accurate computations.
